

## Program Evaluation The Five-Tiered Approach

Level/Title	Purposes of Evaluation	Audiences	Tasks	Kinds of Data to Collect/Analyze
<b>Tier One – Needs Assessment</b>	<ol style="list-style-type: none"> <li>1. To determine the size and nature of a public problem</li> <li>2. To determine unmet need for services in a community</li> <li>3. To propose program and policy options to meet needs</li> <li>4. To set a data baseline from which later progress can be measured</li> <li>5. To broaden the base of support for a proposed program</li> </ol>	<ol style="list-style-type: none"> <li>1. Policymakers</li> <li>2. Funders</li> <li>3. Community stakeholders</li> </ol>	<ol style="list-style-type: none"> <li>1. Review existing community, county, and state data</li> <li>2. Determine additional data needed to describe problem and potential service users</li> <li>3. Conduct “environmental scan” of available resources</li> <li>4. Identify resource gaps and unmet needs</li> <li>5. Set goals and objectives for intervention</li> <li>6. Recommend one program model for range of options</li> </ol>	<ol style="list-style-type: none"> <li>1. Extant data on target population; services currently available</li> <li>2. Interviews with community leaders</li> <li>3. Interviews or survey data from prospective participants</li> <li>4. Information about similar programs in other locations</li> </ol>
<b>Tier Two – Monitoring and Accountability</b>	<ol style="list-style-type: none"> <li>1. To monitor program performance</li> <li>2. To meet demands for accountability</li> <li>3. To build a constituency</li> <li>4. To aid in program planning and decision-making</li> <li>5. To provide a groundwork for later evaluation activities</li> </ol>	<ol style="list-style-type: none"> <li>1. Program staff and administrators</li> <li>2. Policymakers</li> <li>3. Funders</li> <li>4. Community stakeholders</li> <li>5. Media</li> </ol>	<ol style="list-style-type: none"> <li>1. Determine needs and capacities for data collection and management</li> <li>2. Develop clear and consistent procedures for collecting essential data elements</li> <li>3. Gather and analyze data to describe program along dimensions of clients, services, staff, and costs</li> </ol>	<ol style="list-style-type: none"> <li>1. MIS (management information system) data; collected at program, county, and/or state level</li> <li>2. Case material; obtained through record reviews, program contact forms, etc.</li> </ol>
<b>Tier Three – Quality Review and Program Clarification</b>	<ol style="list-style-type: none"> <li>1. To develop a more detailed picture of the program as it is being implemented</li> <li>2. To assess the quality and consistency of the intervention</li> <li>3. To provide information to staff for program improvement</li> </ol>	<ol style="list-style-type: none"> <li>1. Program staff and administrators</li> <li>2. Policymakers</li> <li>3. Community stakeholders</li> </ol>	<ol style="list-style-type: none"> <li>1. Review monitoring data</li> <li>2. Expand on program description using information about participants’ views</li> <li>3. Compare program with standards and expectations</li> <li>4. Examine participants’ perceptions about effects of program</li> <li>5. Clarify program goals and</li> </ol>	<ol style="list-style-type: none"> <li>1. MIS monitoring data</li> <li>2. Case material</li> <li>3. Other qualitative and quantitative data on program operations, customer satisfaction, and perceived effects; obtained using questionnaires, interviews, observations, and focus groups</li> </ol>

			design	
<b>Tier Four – Achieving Outcomes</b>	<ol style="list-style-type: none"> <li>1. To determine changes, if any, have occurred among beneficiaries</li> <li>2. To attribute changes to the program</li> <li>3. To provide information to staff for program improvement</li> </ol>	<ol style="list-style-type: none"> <li>1. Program staff and administrators</li> <li>2. Policymakers</li> <li>3. Community stakeholders</li> <li>4. Funders</li> <li>5. Other programs</li> </ol>	<ol style="list-style-type: none"> <li>1. Choose short-term objectives to be examined</li> <li>2. Choose appropriate research design, given constraints and capacities</li> <li>3. Determine measurable indicators of success for outcome objectives</li> <li>4. Collect and analyze information about effects on beneficiaries</li> </ol>	<ol style="list-style-type: none"> <li>1. Client-specific data; obtained using questionnaires, interviews, goal attainment scaling, observations, and functional indicators</li> <li>2. Client and community social indicators</li> <li>3. MIS data</li> </ol>
<b>Tier Five – Establishing Impact</b>	<ol style="list-style-type: none"> <li>1. To contribute to knowledge development in the field</li> <li>2. To produce evidence of differential effectiveness of treatments</li> <li>3. To identify models worthy of replication</li> </ol>	<ol style="list-style-type: none"> <li>1. Academic and research communities</li> <li>2. Policymakers</li> <li>3. Funders</li> <li>4. General public</li> </ol>	<ol style="list-style-type: none"> <li>1. Decide on impact objectives based on results of Tier Four evaluation efforts</li> <li>2. Choose appropriately rigorous research design and comparison group</li> <li>3. Identify techniques and tools to measure effects in treatment and comparison groups</li> <li>4. Analyze information to identify program impacts</li> </ol>	<ol style="list-style-type: none"> <li>1. Client-specific data; obtained using questionnaires, interviews, goal attainment scaling, observations, and functional indicators</li> <li>2. Client and community social indicators</li> <li>3. MIS data</li> <li>4. Comparable data for control group</li> </ol>
